# NoProblem™

Electronic  
Typing

Jue 80

Want to get your work back  
faster than ever before?  
**NoProblem.**

Want to get your work back  
right the first time? **NoProblem.**

Want your contracts, letters,  
and documents to have the  
appearance and accuracy you  
need? **NoProblem.**

Lanier's **NoProblem** Electronic Typewriter helps your office get words onto paper in half the time or less than it takes with a standard typewriter. No more missed deadlines or postponed meetings because the paperwork isn't ready. Now your contracts, letters, and reports will be ready when you are. They will have the professional appearance and accuracy you expect.

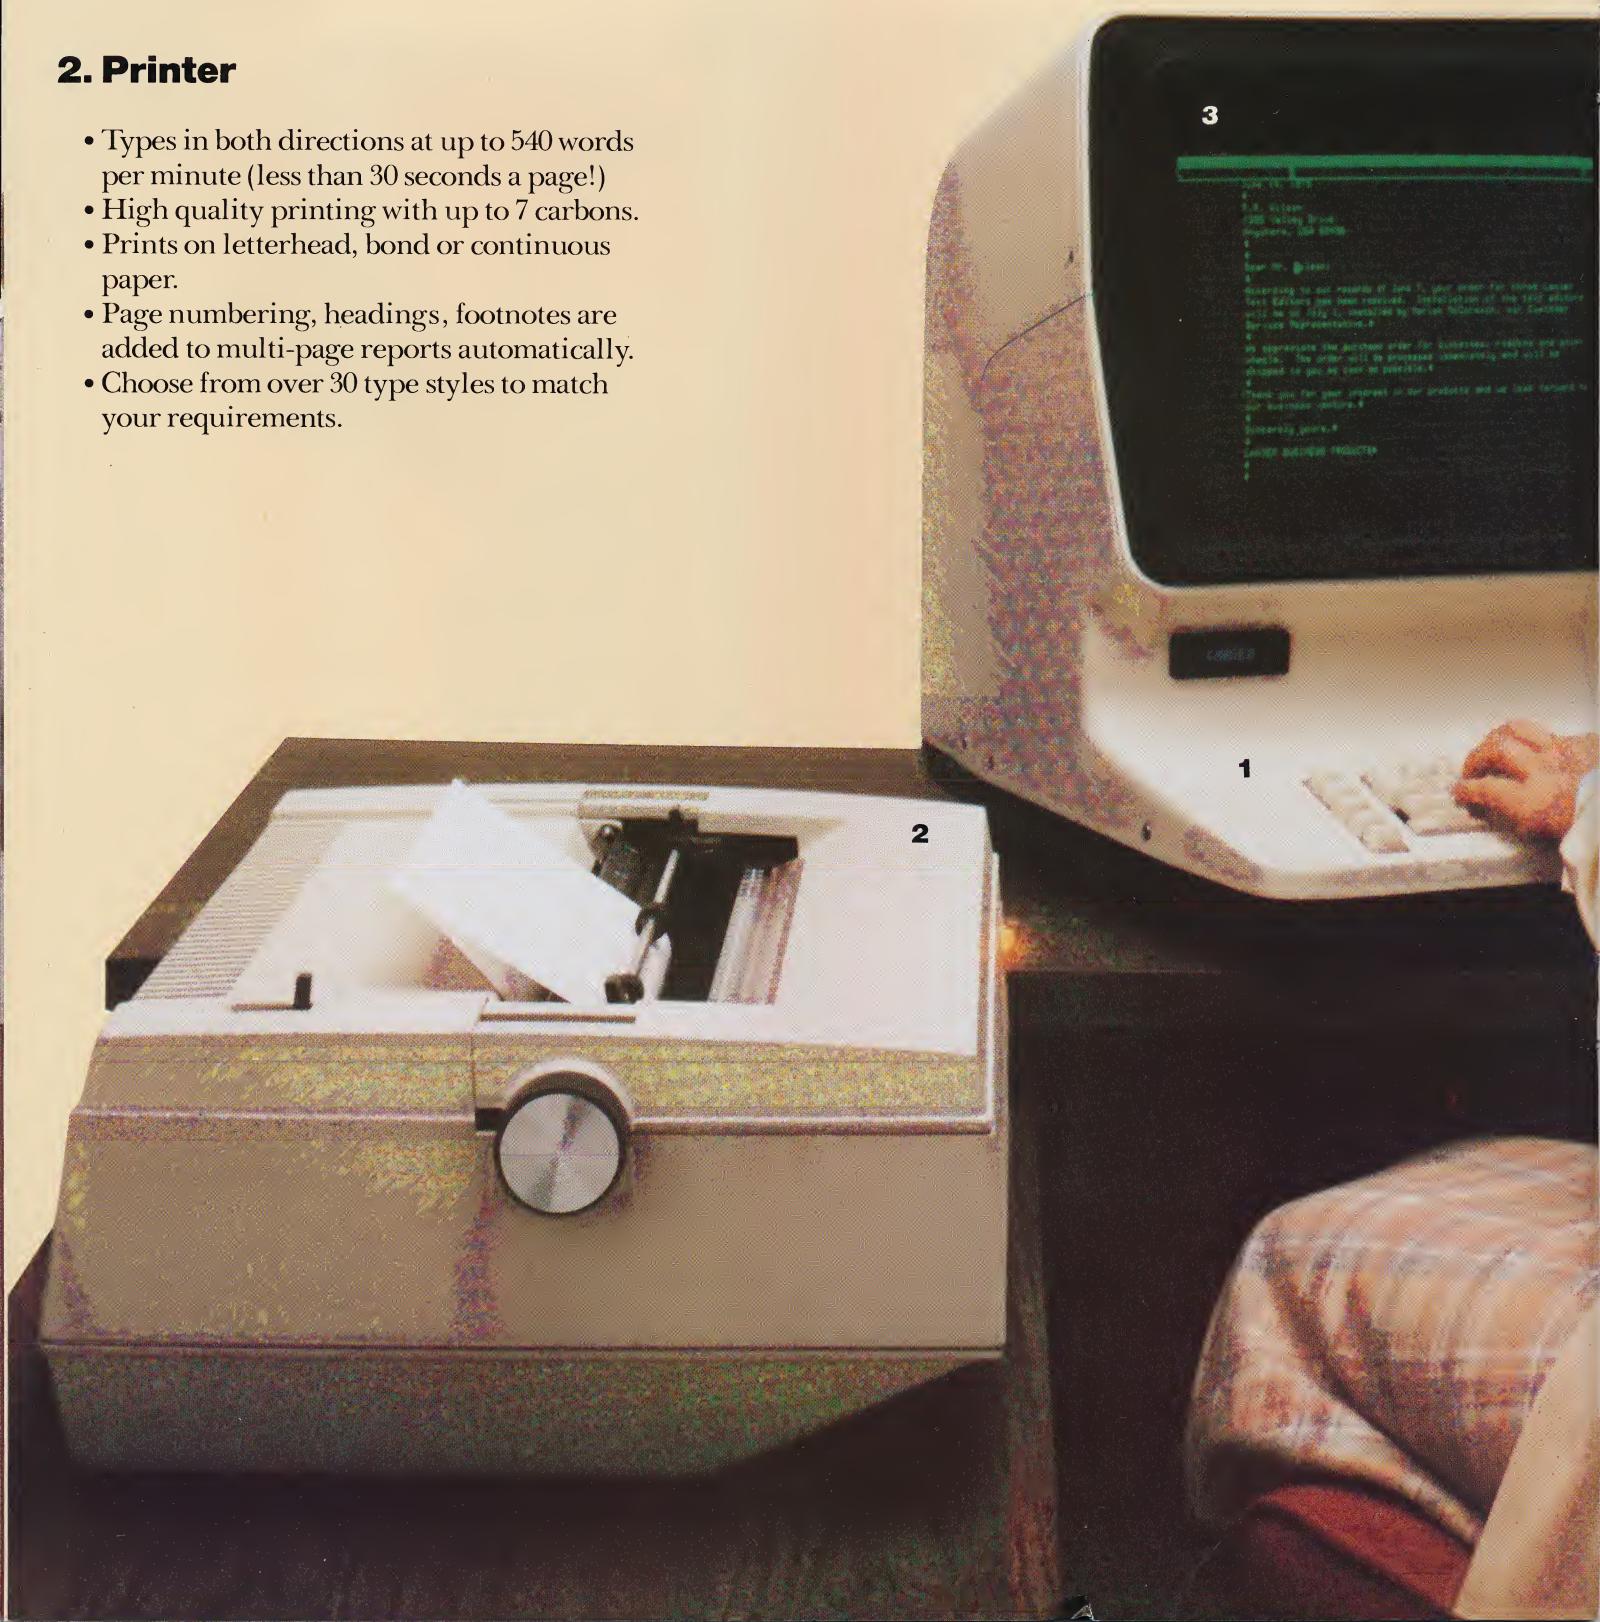

## 1. Keyboard

- Standard typewriter keyboard with fewer control keys.
- No codes to learn. Commands are in simple, everyday English.
- Electronic keyboard increases accuracy and typing speed.

## 2. Printer

- Types in both directions at up to 540 words per minute (less than 30 seconds a page!)
- High quality printing with up to 7 carbons.
- Prints on letterhead, bond or continuous paper.
- Page numbering, headings, footnotes are added to multi-page reports automatically.
- Choose from over 30 type styles to match your requirements.

### **3. Video Display Screen**

- Large, easy-to-read characters help reduce eye-fatigue.
- Proofread right on the screen. Make revisions or corrections simply by typing over.
- Automatic carriage return increases typing speed.
- Horizontal page up to 254 characters wide handles statistical documents without cutting and pasting.

### **4. Microprocessor and Disc Storage**

- Store 25-40 pages (70,000 characters) on small magnetic discs.
- Automatically indexes every page.
- Choose between single-disc or dual-disc units.
- Discs remember margins, tabs, and line spacing for each page.
- Store and automatically type often repeated material—even with variable information.
- Wide variety of Smart Discs™ for customized typing applications.

Want your work back faster?  
**NoProblem.**

Now your secretary can get your typing done faster—at rough draft speed, without worrying about typing errors or carriage returns! Not a word prints on paper until it's exactly the way you want it on the screen. Then with one command the **NoProblem** printer begins typing in both directions at up to 540 words per minute. That's less than 30 seconds per page! Imagine how much faster your work will get done. Even with impossible deadlines you'll have error-free impressive-looking letters and documents on time every time.

Want your work right the first time? **NoProblem.**

It's frustrating when your work needs to be retyped over and over. The **NoProblem** allows your secretary to make corrections by simply typing right over errors on the screen. No more unsightly strike-overs, white-outs, erasures or time lost in retyping entire pages. Never again will your secretary have to retype a whole page because you want to add, delete or change a few words or sentences. Even if every word of a letter must move to accommodate an addition or deletion, the Lanier **NoProblem** moves them automatically in a fraction of a second, without a single wasted sheet of paper.

Want a typewriter that is easy to use? **NoProblem.**

The **NoProblem** is designed with the secretary in mind. Commands are in everyday English. Your secretary can concentrate on getting your work done, rather than complicated keyboards and programming. In fact, the **NoProblem** is so easy to use that your secretary, after a brief orientation, will be able to demonstrate how you can immediately begin to get your work done faster.
